**Title-** "Reduction Energy Consumption: Energy Saving"

**Date:** 05-04-2021

**Time of event:** 10:00 AM

**Activity Location:** Bidar

**Objective of Program:**

1. To reduce demand, protect and replenish supplies,
2. To develop and use alternative energy sources,
3. To clean up the damage from the prior energy processes.

**Importance of Energy Conservation:**

1. Energy conservation helps to reduce carbon footprint in the universe.
2. Most of the energy sources we use cannot be reused and renewed - Non renewable energy sources constitute 80% of the fuel use. It is said that our energy resources may last only for another 40 years or so.
3. We save the country a lot of money when we save energy - About 85 per cent of our crude oil needs are met from imports which costs about Rs. 8 lakh crore annually
4. Energy saved is energy generated - When we save one unit of energy, it is equivalent to 2 units of energy produced
5. Save energy to reduce pollution - Energy production and use account to large proportion of air pollution and more than 83 percent of greenhouse gas emissions

**Methods of Energy saving:**

1. If there is sufficient ventilation at home, then switch off the fans and do not use Air Conditions.
2. Switch off the lights at day time, and use lights only wherever required.
3. Make use of energy efficient lighting bulbs.
4. Use solar sources of energy.
5. Dry clothes in the sunlight rather than using electric dryers.

**Program Schedule:** One day to Bidar rural villages

## Details of Program:

The vaccination drive refers to the nationwide campaign to vaccinate the population against various infectious diseases, including COVID-19.

In the context of the current COVID-19 pandemic, the vaccination drive has been a top priority for governments around the world. The COVID-19 vaccines have been developed and approved for emergency use in many countries, and vaccination drives have been launched to administer the vaccines to the population.

Vaccination drives are essential to protect individuals and communities from infectious diseases. Vaccines work by introducing a weakened or inactivated form of the disease-causing pathogen into the body, which triggers an immune response that produces antibodies to fight the disease. This process enables the body to develop immunity to the disease without contracting the full-blown illness.

## Program Outcome:

To encourage people to get vaccinated

**IOM/Circular:**

Circular is attached.

**Event Poster:**

Poster of the event is attached

**Objective of Program:**

1. To educate rural people about waste water management in their places.
2. To how to maintain and save consistence wastewater management, which is helpful for irrigation and other purpose

**Program Outcome:**

The outcome of the seminar on NCC Camp would be the following:

1. To share their own knowledge about maintaining and saving consistent wastewater management, which is helpful for irrigation and other useful purposes.
2. This community would continue to be a valuable resource as attendees to share their ideas on waste water management and its goals.

**Event Type:** Offline

## **TREE PLANTATION**

The students of Electronics and Communication Engineering department conducted the programme of tree plantation. This drive was conducted under the programme officer Dr. Kishan Singh along with Prof. Prof.Soni Mankari, Prof.Pradeep Karanje as coordinators.

Tree planting is recognized as one of the most engaging, environmentally-friendly activities that people can participate in to help the planet when done properly. Trees provide numerous long-term and short-term benefits. They not only look nice, but they also remove and store carbon from the atmosphere, slow heavy rain and thus reduce the risk of flooding, improve air quality, and reduce the urban heat island effect by reflecting sunlight and providing shade.

### **Benefits of Tree Plantation:**

They are so valuable and significant that their applications have only grown to meet the demands of our modern lifestyles. Initially, the tree's wood was used as fuel, and the fruits were devoured by people. The shade was utilized to keep cool in the summer and the fire was used to keep warm in the winter.

### **Program Outcome:**

We recognize that one of the most serious issues in the current state is the devaluation of trees. To make our world greener and better, we must pay more attention to tree planting in the future. Individual contributions should be made first. We should also put a stop to tree cutting and remember that without trees, there will be no life. The tree is very important in our lives. Everyone should be aware of the importance of tree planting and should motivate and encourage others to do the same.

## MECHANICAL ENGINEERING DEPARTMENT

### Objective of Program:

1. To bring awareness about importance of sanitization.
2. To protect public health .
3. To ensure access to clean water.
4. To promote sustainable development

### Importance of SANITIZATION AWARENESS PROGRAMME:

1. To get protection from various diseases.
2. To maintain cleanliness at surroundings for healthy life.
3. To uphold human right.
4. To ensure equity .

### Details of Program:

Creating awareness of various sanitization methods and it's importance to village people.

### Program Outcome:

1. Protection from diseases such as cholera, typhoid etc.
2. Develops Antimicrobial resistance.
3. Reduction in cost in medical treatment.
