Ref. No. GNDECB/

Date: 25/08/2017

NOTICE

It is being observed that plastic materials like carry bags, banners, flex bags, cups and spoons are being used in the college premises resulting in environmental hazard. With a the goal to make our campus "Plastic Free Campus" all the staff and students shall dispense with the use of single use plastic items in their respective areas and make alternative arrangements to prevent the generation of plastic waste.

It is being instructed to all the HODs to create awareness among all the students & staff for effective implementation of "Plastic Free Campus"

This is for strict compliance.

NOTICE

I hope this circular finds you in good health and high spirits. Today, I am delighted to announce the launch of our initiative to transform our GND engineering college campus into a plastic-free environment. We firmly believe that by taking this step, we can contribute significantly to environmental conservation and inspire a culture of sustainability among our community members.

Plastic pollution has emerged as a pressing global issue, impacting our ecosystems, wildlife, and human health. As responsible individuals, it is our duty to take proactive measures to combat this problem. By eliminating single-use plastics from our campus, we can create a healthier and more sustainable environment for everyone.

To ensure the success of this initiative, we have developed a comprehensive action plan that requires the participation and support of each staff and student of our college.

We would like to encourage everyone to bring their own reusable water bottles, coffee cups, and food containers and replace plastic cutlery, plates and cups with biodegradable or compostable alternatives.

We appreciate your cooperation in making our campus plastic-free. Together, we can make a difference for the environment.

NOTICE

As you know, plastic pollution is a major environmental problem. Plastic waste can take hundreds of years to decompose, and it can end up in our oceans, rivers, and landfills. It can also harm wildlife and contaminate our food and water.

In order to help reduce plastic pollution, we are committed to making our campus plastic-free. This means that we will be banning the use of single-use plastics on campus, such as plastic bags, straws, utensils, and bottles.

We understand that this may be a change for some of you, but we believe that it is important to do our part to protect the environment. We are confident that you will all be supportive of this initiative.

Here are some tips on how you can help make our campus plastic-free:

- Bring your own reusable bags.
- Use a reusable water bottle instead of buying bottled water.
- Bring your own utensils when you eat out.
- Say no to plastic straws.
- Choose products that are made from sustainable materials, such as paper, metal, or glass.

We appreciate your cooperation in making our campus plastic-free. Together, we can make a difference for the environment.

All the staff and students are requested to strictly adhere

REPORT

The department of CSE conducted an awareness program on **"Plastic Free Campus"** on 18/04/2023 in Mini Auditorium at 10:00 AM.

The program was inaugurated by Dr. Dhananjay M., Principal GNDEC, speaking on the occasion, he said Plastic pollution is a major environmental problem. Plastic waste can take hundreds of years to decompose, and it is contaminating our foods & water. Due to this, human beings and animals are facing very serious health issues. Therefore, we need to stop the plastic use. He Quoted *"carry a bag instead of carry bag"* Speaking on occasion, the Department HOD, Dr Monohar Madgi, urged the students to bring their own reusable bags, use a reusable water bottle like copper or steel instead of buying plastic water bottles, say no to plastic straws, and choose products that are made from sustainable materials such as paper, metal or glass. Students performed various programs, like skits, to highlight the health hazards caused due to plastic use. Nearly 200 students and faculty members were present.
